# Publications of Richard P. Brent

ORCID ID: 0000-0002-8495-7437

Most of these publications are available online from
`https://maths-people.anu.edu.au/~brent/pub/pubsall.html`.

[1] M. P. C. Legg and R. P. Brent, Automatic contouring, *Proceedings of the Fourth Australian Computer Conference*, Australian Computer Society, Adelaide, 1969, 467–468. CR 12#21982.

[2] R. P. Brent, *Algorithms for matrix multiplication*, Report TR-CS-70-157, DCS, Stanford (March 1970), 52 pp.

[3] R. P. Brent, On the addition of binary numbers, *IEEE Transactions on Computers* C-19 (1970), 758–759. CR 12#20898.

[4] R. P. Brent, Error analysis of algorithms for matrix multiplication and triangular decomposition using Winograd's identity, *Numerische Mathematik* 16 (1970), 145–156. MR0279981 (43#5702), CR 12#21408.

[5] R. P. Brent, An algorithm with guaranteed convergence for finding a zero of a function, *Computer J.* 14 (1971), 422–425. MR0339475 (49#4234), Zbl 231.65046.

[6] R. P. Brent, *Algorithms for finding zeros and extrema of functions without calculating derivatives*, Report TR CS 198, DCS, Stanford (February 1971), 313 pp. (Ph. D. thesis, available from NTIS, #AD726170.)

[7] R. P. Brent, A new algorithm for minimizing a function of several variables without calculating derivatives, in *Optimization* (edited by R. S. Anderssen, L. S. Jennings and D. M. Ryan), University of Queensland Press, Brisbane, 1972, 14–25. MR 52#2574, 52#9601, Zbl 311.90065.

[8] R. P. Brent, On the Davidenko-Branin method for solving simultaneous nonlinear equations, *IBM J. Research and Development* 16 (1972), 434–436. CR 14#24419, MR0334498 (48#12817), Zbl 276.65023. Also appeared as "A note on the Davidenko-Branin method for solving simultaneous nonlinear equations", Report TR RC 3506, IBM Research (August 1971), 7 pp.

[9] R. P. Brent, A modified linear scatter storage technique, *IBM Technical Disclosure Bulletin* 14, 11 (1972), 3489.

[10] R. P. Brent, An optimal secant method for solving systems of nonlinear equations, *IBM Technical Disclosure Bulletin* 15, 4 (1972), 1216–1217.

[11] R. P. Brent, *Algorithms for Minimization without Derivatives*, Prentice-Hall, Englewood Cliffs, New Jersey, 1973, 195 pp. ISBN 0-13-022335-2. Reviewed in: *American Scientist* 61 (May-June 1973), 374; *Mathematical Programming* 4 (1973), 349; *Computer J.* 16 (1973), 314; *Mathematics of Computation* 28 (1974), 865–866; CR 15#26544; MR0339493 (49#4251); Zbl 245.65032. Errata: *Mathematics of Computation* TE 520, 29 (1975), 1166. MR 51#7283. Reprinted January 2002 by Dover Publications, Mineola, New York. ISBN 0-486-41998-3. Reissued (with corrections) March 2013 by Dover Publications, Mineola, New York. ISBN-13: 978-0-486-41998-5 (pbk.), ISBN-10: 0-486-41998-3 (pbk.). Errata: `http://maths-people.anu.edu.au/~brent/pub/pub011.html`. A preliminary version appeared as [6].

[12] R. P. Brent, The computational complexity of iterative methods for systems of nonlinear equations, in *Complexity of Computer Computations* (edited by R. E. Miller and J. W. Thatcher), Plenum Press, New York, 1972, 61–71. MR 51#9575, 52#4703.

[13] R. P. Brent, Reducing the retrieval time of scatter storage techniques, *Communications of the ACM* 16 (1973), 105–109. Zbl 251.68019. Also appeared as "A modified linear scatter storage technique", Report TR RC 3460, IBM Research (July 1971), 20 pp. See also "Comment on Brent's scatter storage algorithm", *Communications of the ACM* 16 (1973), 703.

[14] R. P. Brent, Some efficient algorithms for solving systems of nonlinear equations, *SIAM J. Numerical Analysis* 10 (1973), 327–344 (George E. Forsythe memorial issue). MR 48#10096, CR 17#29965, Zbl 258.65051. A preliminary version appeared as *On maximizing the efficiency of algorithms for solving systems of nonlinear equations*, Report TR RC 3725, IBM Research (February 1972), 33 pp.

[15] R. P. Brent, D. J. Kuck and K. Maruyama, The parallel evaluation of arithmetic expressions without division, *IEEE Transactions on Computers* C-22 (1973), 532–534. MR0423869 (50#11843).

[16] R. P. Brent, S. Winograd and P. Wolfe, Optimal iterative processes for rootfinding, *Numerische Mathematik* 20 (1973), 327–341. CR 15#26753, MR0317532 (47#6079). A preliminary version appeared as Report TR RC 3960, IBM Research (August 1972), 29 pp.

[17] R. P. Brent, On the precision attainable with various floating-point number systems, *IEEE Transactions on Computers* C-22 (1973), 601–607. CR 14#25960, Zbl 261.65036. Also appeared as Report TR RC 3751, IBM Research (February 1972), 28 pp. arXiv:1004.3374.

[18] R. P. Brent, The parallel evaluation of arithmetic expressions in logarithmic time, in *Complexity of Sequential and Parallel Numerical Algorithms* (edited by J. F. Traub), Academic Press, New York, 1973, 83–102. CR 15#26540, 15#27335; MR 50#15432; Zbl 273.68037.

[19] R. P. Brent, The first occurrence of large gaps between successive primes, *Mathematics of Computation* 27 (1973), 959–963. MR 48#8360, Zbl 269.10002. For a sequel see [57].

[20] R. P. Brent, Sources of error in computation, in *Error, Approximation and Accuracy* (edited by F. R. de Hoog and C. L. Jarvis), University of Queensland Press, Brisbane, 1973, 122–128. MR 52#2124, 54#9069; Zbl 312.65035.

[21] R. P. Brent, The distribution of small gaps between successive primes, *Mathematics of Computation* 28 (1974), 315–324. MR 48#8356, Zbl 274.10001. Also *Mathematics of Computation* UMT file, *ibid*, 331–332. A preliminary version appeared as "Empirical evidence for a proposed distribution of small prime gaps", Report TR CS 123, DCS, Stanford (February 1969), 18 pp.

[22] R. P. Brent, The parallel evaluation of general arithmetic expressions, *J. ACM* 21 (1974), 201–206. CR 15#27055, MR0660280 (58#31996), Zbl 276.68010.

[23] R. P. Brent, Algorithm 488: A Gaussian pseudo-random number generator [G5], *Communications of the ACM* 17 (1974), 704–706. Zbl 292.65003.

[24] R. P. Brent, Irregularities in the distribution of primes and twin primes, *Mathematics of Computation* 29 (1975), 43–56 (Derrick H. Lehmer special issue). MR 50#1791, 51#5522; Zbl 295.10002. Errata: *ibid* 30 (1976), 198. MR 53#302. See also "Tables concerning irregularities in the distribution of primes and twin primes", UMT 4, *ibid* 29 (1975), 331; and "Tables concerning irregularities in the distribution of primes and twin primes to $10^{11}$", UMT 21, *ibid* 30 (1976), 379.

[25] R. P. Brent, *Numerical solution of nonlinear equations*, DCS, Stanford (March 1975), 189 pp.

[26] R. P. Brent, Some high-order zero-finding methods using almost orthogonal polynomials, *J. Australian Mathematical Society (Series B)* 19 (1975), 1–29. MR 52#16000, Zbl 333.65022. Also appeared as "Efficient methods for finding zeros of functions whose derivatives are easy to evaluate", Technical Report, DCS, CMU (December 1974), 62 pp.

[27] R. P. Brent, A class of optimal-order zero-finding methods using derivative evaluations, in *Analytic Computational Complexity* (edited by J. F. Traub), Academic Press, 1975, 59–73. Reviewed in *Australian Computer J.* 9 (1977), 100; MR 52#15938, 54#9073; Zbl 342.65030. Also appeared as a Technical Report, DCS, CMU (June 1975), 15 pp.

[28] R. P. Brent, Multiple-precision zero-finding methods and the complexity of elementary function evaluation, in *Analytic Computational Complexity* (edited by J. F. Traub), Academic Press, New York, 1975, 151–176. Reviewed in *Australian Computer J.* 9 (1977), 100; MR0395140 (52#15938), MR0423869 (54#11843), Zbl 342.65031. Also appeared as a Technical Report, DCS, CMU (July 1975), 26 pp. arXiv:1004.3412.

[29] R. P. Brent and H. T. Kung, $O((n \log n)^{3/2})$ algorithms for composition and reversion of power series, in *Analytic Computational Complexity* (edited by J. F. Traub), Academic Press, New York, 1975, 217–225. Reviewed in *Australian Computer J.* 9 (1977), 100; MR 52#15938, 55#1699; Zbl 342.65010. Also appeared as a Technical Report, DCS, CMU (May 1975), 7 pp.

[30] J. P. Abbott and R. P. Brent, Fast local convergence with single and multistep methods for nonlinear equations, *J. Australian Mathematical Society (Series B)* 19 (1975), 173–199. MR 55#4677; Zbl 359.65044, 389.65037. Errata: *ibid* 20 (1977), 254. MR 58#13673.

[31] R. S. Anderssen and R. P. Brent (editors), *The Complexity of Computational Problem Solving*, University of Queensland Press, Brisbane, 1976, 262 pp. LC 76-374278, ISBN 0-7022-1213-X. Reviewed in *Computer J.* 21 (1978), 242.

[32] R. P. Brent, The complexity of multiple-precision arithmetic, in [31], 126–165. arXiv:1004.3608.

[33] R. S. Anderssen, R. P. Brent, D. J. Daley and P. A. P. Moran, Concerning $\int_0^1 \cdots \int_0^1 (x_1{}^2 + \cdots + x_k{}^2)^{1/2} dx_1 \ldots dx_k$ and a Taylor series method, *SIAM J. Applied Mathematics* 30 (1976), 22–30. MR 52#15773, Zbl 337.65022.

[34] R. P. Brent, Fast multiple-precision evaluation of elementary functions, *J. ACM* 23 (1976), 242–251. MR0395314 (52#16111), Zbl 324.65018. Also appeared as Report TR STAN-CS-75-515, DCS, Stanford (August 1975), 22 pp. See also *Computer Bulletin (Series 2)* 29 (September 1981), 26–27; and *ibid* 30 (December 1981), 9–10.

[35] R. P. Brent, *MP Users Guide*, Report TR 54, Computer Centre, ANU (September 1976), 53 pp. Revisions published as *MP Users Guide (second edition)*, Computing Research Group, ANU (August 1978), 44*pp.*; *MP Users Guide (third edition)*, TR-CS-79-08, DCS, ANU (December 1979), 73*pp.*; and *MP Users Guide (fourth edition)*, TR-CS-81-08, DCS, ANU (June 1981), 73 pp. arXiv:1004.3173.

[36] R. P. Brent, *Knuth's constants to 1000 decimal and 1100 octal places*, Report TR 47, Computer Centre, ANU (September 1975), 25 pp. See also UMT 30, *Mathematics of Computation* 30 (1976), 668.

[37] R. P. Brent, Analysis of the binary Euclidean algorithm, in *New Directions and Recent Results in Algorithms and Complexity* (edited by J. F. Traub), Academic Press, New York, 1976, 321–355. Reviewed in *Australian Computer J.* 10 (1978), 76–77; MR 54#14417, 55#11701; Zbl 363.00013, 373.68040. Also appeared as a Technical Report, DCS, CMU (June 1976), 35 pp. Extended abstract appeared in *SIGSAM Bulletin* (May 1976). For errata see [183].

[38] R. Towle and R. P. Brent, On the time required to parse an arithmetic statement for parallel processing, in *Proceedings of the 1976 International Conference on Parallel Processing* (edited by P.H. Enslow), IEEE, New York, 1976, 254. (IEEE Catalog #76CH1127-0C.)

[39] R. P. Brent and H. T. Kung, Fast algorithms for composition and reversion of multivariate power series, in *Proceedings of a Conference on Theoretical Computer Science* held at the University of Waterloo, DCS, University of Waterloo, Waterloo, Ontario (August 1977), 149–158. Zbl 404.00019, 411.68043.

[40] R. P. Brent, Computation of the regular continued fraction for Euler's constant, *Mathematics of Computation* 31 (1977), 771–777. MR 55#9490, Zbl 369.10002. See also "$\gamma$ and $\exp(\gamma)$ to 20700D and their regular continued fractions to 20000 partial quotients", UMT 1, *ibid* 32 (1978), 311. For a sequel see [49].

[41] A. H. Sameh and R. P. Brent, Solving triangular systems on a parallel computer, *SIAM J. Numerical Analysis* 14 (1977), 1101–1113. MR 56#17026, Zbl 375.65016. Also appeared as Report TR UIUCDCS-R-75-766, DCS, University of Illinois, Urbana, Illinois (November 1975), 18 pp.

[42] R. P. Brent, A Fortran multiple-precision arithmetic package, *ACM Transactions on Mathematical Software* 4 (1978), 57–70. CR 20#34962. Also appeared as a Technical Report, DCS, CMU (May 1976), 29 pp.

[43] R. P. Brent, Algorithm 524: MP, a Fortran multiple-precision arithmetic package [A1], *ACM Transactions on Mathematical Software* 4 (1978), 71–81. See also "Remark on Algorithm 524", *ibid* 5 (1979), 518–519.

[44] J. P. Abbott and R. P. Brent, A note on continuation methods for the solution of nonlinear equations, *J. Australian Mathematical Society (Series B)* 20 (1978), 157–164. MR 58#13672, Zbl 392.65017.

[45] R. P. Brent and H. T. Kung, Fast algorithms for manipulating formal power series, *J. ACM* 25 (1978), 581–595. CR 20#34535, MR0520733 (58#25090), Zbl 388.68052. Also appeared as a Technical Report, DCS, CMU (January 1976), 38 pp.

[46] R. P. Brent, T. Dwyer, S. J. Edwards, A. D. Glenn, D. A. Hawking, A. J. Hurst, C. W. Johnson, N. Justusson, T. Kelly, B. P. Molinari, D. L. Poole, J. M. Robson and I. R. Simpson, Comments on the draft Pascal standard, *Australian Computer Science Communications* 1 (1979), 310–317. Also appeared as Report TR-CS-79-09, DCS, ANU (October 1979), 9 pp.

[47] R. P. Brent, On the zeros of the Riemann zeta function in the critical strip, *Mathematics of Computation* 33 (1979), 1361–1372. MR 80g:10033, Zbl 422.10031. A preliminary version appeared as "Computation of the zeros of the Riemann zeta function in the critical strip", Report TR CMU-CS-78-148, DCS, CMU (November 1978), 27 pp. A progress report appeared as "The first 40,000,000 zeros of the Riemann zeta function lie on the critical line", *AMS Notices* 24 (1977), A-417, 77T-A161. See also RMT 11, *Mathematics of Computation* 31 (1977), 803–804. For a sequel see [70].

[48] R. P. Brent and R. A. Jarvis (editors), *Proceedings of the Third Australian Computer Science Conference*, special issue of *Australian Computer Science Communications* 2, 1 (January 1980), 222 pp.

[49] R. P. Brent and E. M. McMillan, Some new algorithms for high-precision computation of Euler's constant, *Mathematics of Computation* 34 (1980), 305–312. MR 82g:10002. Also appeared as Report TR LBL-8729, Lawrence Berkeley Laboratory; and as Report TR-CS-79-03, DCS, ANU (January 1979), 16 pp. See also "Euler's constant and its exponential to 30,100 decimals", and "The first 29,000 partial quotients in the regular continued fraction for Euler's constant and its exponential", *Mathematics of Computation* UMT File.

[50] R. P. Brent and J. F. Traub, On the complexity of composition and generalized composition of power series, *SIAM J. Computing* 9 (1980), 54–66. MR 81b:68042. Also appeared as Report TR CMU-CS-78-128, DCS, CMU (May 1978), 34 pp. Abstract appeared in *SIGSAM Bulletin* 12, 2 (May 1978), 9.

[51] R. P. Brent, An improved Monte Carlo factorization algorithm, *BIT* 20 (1980), 176–184. MR 82a:10007, Zbl 439.65001. Also appeared as "Analysis of some new cycle finding and factorization algorithms", Report TR-CS-79-11, DCS, ANU (November 1979), 10 pp.

[52] R. P. Brent, Unrestricted algorithms for elementary and special functions, in *Information Processing 80* (edited by S. H. Lavington), North-Holland, Amsterdam, 1980, 613–619. CR 22#38728, MR 81i:68009. Also appeared as Report TR-CS-79-13, DCS, ANU (November 1979), 20 pp. arXiv 1004.3621.

[53] R. P. Brent and H. T. Kung, The chip complexity of binary arithmetic, *Proceedings of the Twelfth Annual ACM Symposium on the Theory of Computing*, ACM, New York, 1980, 190–200.

[54] R. P. Brent, J. A. Hooper and J. M. Yohe, An Augment interface for Brent's multiple-precision arithmetic package, *ACM Transactions on Mathematical Software* 6 (1980), 146–149. CR 21#36520, Zbl 433.68028. A longer version appeared as Technical Summary Report #1868, Mathematics Research Center, University of Wisconsin, Madison (August 1978), 26 pp.

[55] R. P. Brent and H. T. Kung, The area-time complexity of binary multiplication, *J. ACM* 28 (1981), 521–534. CR 22#38242, MR 82i:68027. Corrigendum: *ibid* 29 (1982), 904. MR 83j:68046. Also appeared as Report TR-CS-79-05, DCS, ANU; and as Report TR CMU-CS-79-136, DCS, CMU (July 1979), 25 pp.

[56] R. P. Brent and H. T. Kung, On the area of binary tree layouts, *Information Processing Letters* 11 (1980), 46–48. Also appeared as Report TR-CS-79-07, DCS, ANU (July 1979), 5 pp.

[57] R. P. Brent, The first occurrence of certain large prime gaps, *Mathematics of Computation* 35 (1980), 1435–1436. MR 81g:10002, Zbl 443.10003.

[58] G. M. Baudet, R. P. Brent and H. T. Kung, Parallel execution of a sequence of tasks on an asynchronous multiprocessor, *Australian Computer J.* 12 (1980), 105–112. MR 81j:68036, Zbl 437.68016. A preliminary version appeared as a Technical Report, DCS, CMU (June 1977), 28 pp.

[59] R. P. Brent, F. G. Gustavson and D. Y. Y. Yun, Fast solution of Toeplitz systems of equations and computation of Padé approximants, *J. Algorithms* 1 (1980), 259–295. MR0604867 (82d:65033). Also appeared as Report TR RC 8173, IBM Research (January 1980); and as Report TR-CS-79-06, DCS, ANU (June 1980), 36 pp.

[60] R. P. Brent and H. T. Kung, A regular layout for parallel adders, *IEEE Transactions on Computers* C-31 (1982), 260–264. MR 83b:68002. Also appeared as Report TR-CS-79-04, DCS, ANU; and as Report TR CMU-CS-79-131, DCS, CMU (June 1979), 16 pp.

[61] R. P. Brent and J. M. Pollard, Factorization of the eighth Fermat number, *Mathematics of Computation* 36 (1981), 627–630. MR 83h:10014. Also appeared as Report TR-CS-80-12, DCS, ANU, (September 1980), 7 pp. Preliminary announcement in *AMS Abstracts* 1 (1980), 565, 80T-A212. See [161] for a sequel.

[62] R. P. Brent, *Topics in computational complexity and the analysis of algorithms*, Report TR-CS-80-14, DCS, ANU, October 1980, 375 pp. (D. Sc. thesis, includes [3, 12, 13, 14, 15, 16, 18, 22, 27, 28, 32, 34, 37, 39, 45, 50, 55, 60].)

[63] R. P. Brent, Comments on papers by Maddison and Westreich (correspondence), *Computer J.* 24 (1981), 95–96.

[64] R. P. Brent and L. M. Goldschlager, Some area-time tradeoffs for VLSI, *SIAM J. on Computing* 11 (1982), 737–747. MR 83k:68024. Preliminary version appeared as Report # 22, DCS, University of Queensland (August 1980), 18pp; and as Report TR-CS-80-15, DCS, ANU (Dec. 1980), 18 pp. A shorter version appeared as [72].

[65] A. W. Bojanczyk, R. P. Brent and H. T. Kung, Numerically stable solution of dense systems of linear equations using mesh-connected processors, *SIAM J. Scientific and Statistical Computing* 5 (1984), 95–104. MR 85b:65026. Also appeared as Report TR-CS-81-01, DCS, ANU; and as Report TR-CS-81-119, DCS, CMU (May 1981), 23 pp.

[66] R. P. Brent, Succinct proofs of primality for the factors of some Fermat numbers, *Mathematics of Computation* 38 (1982), 253–255. MR 82k:10002. Also appeared as Report TR-CS-81-04, DCS, ANU, January 1981, 6 pp.

[67] R. P. Brent, New factors of Mersenne numbers (preliminary report), *AMS Abstracts* 2 (1981), 367, 81T-10-246; part II, *ibid* 3 (1982), 132, 82T-10-22; part III, *ibid* 4 (1983), 197, 83T-10-138.

[68] R. P. Brent, Efficient implementation of the first-fit strategy for dynamic storage allocation, *Proceedings of the Fourth Australian Computer Science Conference*, special issue of *Australian Computer Science Communications* 3 (1981), 25–34. Also appeared as Report TR-CS-81-05, DCS, ANU, February 1981, 10 pp. A revised version appeared as [89].

[69] R. P. Brent, An idealist's view of semantics for integer and real types, *Proceedings of the Fifth Australian Computer Science Conference*, special issue of *Australian Computer Science Communications* 4 (1982), 130–140. Also appeared as Report TR-CS-81-14, DCS, ANU, November 1981, 13 pp.

[70] R. P. Brent, J. van de Lune, H. J. J. te Riele and D. T. Winter, On the zeros of the Riemann zeta function in the critical strip, II, *Mathematics of Computation* 39 (1982), 681–688. MR 83m:10067. Corrigendum *ibid* 46 (1986), 771. MR 87e:11103. Also appeared as Technical Report NW 121/82, Mathematisch Centrum, Amsterdam; and as Report TR-CS-82-01, DCS, January 1982, 13 pp. A longer version appeared as [81].
