ON DETERMINANTS OF RANDOM SYMMETRIC MATRICES OVER $\mathbf{Z_m}$

RICHARD P. BRENT AND BRENDAN D. MCKAY

Abstract

We determine the probability that a random $n \times n$ symmetric matrix over $\{1, 2, \ldots, m\}$ has determinant divisible by m.

Comments

Only the Abstract is given here. The full paper appeared as [2]. For related work on random unsymmetric matrices, see [1].
